On March 31, 2026, the Fund paid the following per share distributions on its classes of common stock to shareholders of record during the month of March 2026.

The timing and character of distributions for federal income tax purposes are determined in accordance with income tax regulations, which differ from generally accepted accounting principles (“GAAP”). As such, all or a portion of this distribution may be reportable as a return of capital on your 2026 federal income tax return. The final tax character of distributions declared in 2026 will be determined in January 2027 and reported to you separately from this notice on IRS Form 1099-DIV.

For the purposes of satisfying Section 19(a) reporting obligations, the Fund estimates that 77% of the distribution of Class I shares, 76% of the distribution of Class D shares, 74% of the distribution of Class S and 74% of distribution of Class U shares for the current month is attributable to net investment income when calculated using GAAP and the remaining is attributable to a return of capital. These amounts, calculated in accordance with GAAP, are not intended as a disclosure of the treatment of distributions for federal tax purposes.
